## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a method for performing optical signal, classified in class 356, subclass 487.
- II. Claims 19 -37, drawn to a device operable to distribute optical signals and beams in a heterodyne interferometer, classified in class 385, subclass 15.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)). In the instant case the product as claimed can be made by another and materially process. For example, for achieving dimensional control of matched planar lightwave circuit waveguide lengths can be use different techniques rather than photolithographic techniques.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Augustine Leonard on January 28, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant (s) are given thirty days (30) from the date of this letter to provide the election, as indicated above so as to avoid the question of abandonment.

Any inquiry concerning this communication should be directed to Examiner Akm Enayet Ullah at telephone 571-272-2361.
